

Lecture Series Summary Report

June 5th, 2015

For the 2015, the PA partnered with the Office of Advancement - Alumni Relations to jointly offer lectures to the TFS Community featuring TFS graduates. This decision was made in the spirit that these lectures would both be informative and showcase the incredible talent of TFS graduates.

In 2015, two events took place and one is planned for the fall.

On January 27th, 2015, The Lecture Series presented Memory and Retention for Effective Learning in Children. The presenters were Drs. Shayna Rosenberg and Alice Kim. This lecture featured the research study that the TFS Learning Forum is participating in conjunction with Baycrest and the University of Toronto.

On April 21, 2015 The Lecture Series presented The Well Balanced Student. The presenters were Zia Lakdawalla ('93) and Wendy Manel. This interactive presentation gave parents practical tools to deal with stress and overscheduling in students.

In the fall 2015, Dr. Samantha Nutt will speak to both students and parents on:

Conflicted? The World of War

This presentation takes a compelling look at the impact of war – the truth, the lies, and the reality on the ground – and the major events currently shaping our world. Geared towards students, educator and general audiences, this captivating presentation examines our growing global economic and security inter-dependence, and explores the meaning of social justice and community in the 21st century.

The PA is currently waiting to hear from administration for a suitable date in November for this lecture.
